Precautions

Preface

Section Title List

Part 1 Introduction to Microwave Energy

- Chapter One** *A Brief History of Microwave Oven Development*
Chapter Two *Basic Principles of Microwave Energy*
Chapter Three *Safety of Microwave Energy: An Objective Discussion*

Part 2 Preparing to Repair Microwave Ovens

- Chapter Four** *Safety Considerations*
Chapter Five *A Well-Organized Shop*
Chapter Six *Rendering In-Home Service with Confidence*

Part 3 Description of Operation

- Chapter Seven** *The High-Voltage System*
Chapter Eight *Control Systems*
Chapter Nine *Safety and Protection Circuits*
Chapter Ten *Microwave Containment Systems*
Chapter Eleven *Cooling and Energy Dispersion Systems*

Part 4 Component Tests, Failures, and Corrective Actions

- Chapter Twelve** *High Voltage Components Testing and Failure Modes*
Chapter Thirteen *Control Components: Tests and Failures*
Chapter Fourteen *Safety and Protection Circuits: Tests and Failures*
Chapter Fifteen *Containment Systems: Checks and Failures*
Chapter Sixteen *Cooling and Energy Dispersion: Checks and Failures*

Part 5 Troubleshooting By Symptom, Make, and Model

- Chapter Seventeen *The Art of Common Sense Troubleshooting*
Chapter Eighteen *Troubleshooting Commercial Models—Service Codes and Procedures*

Appendices

- Appendix I *Touch Panel Test and Reference Matrix Diagrams*
Appendix II *Microwave Cooking Techniques*
Appendix III *Glossary*
Appendix IV *Manufacturer's Addresses*
Appendix V *Repair Case History Database—Symptoms and Solutions*

Library of Congress Cataloging-in-Publication Data

Gallawa, J. Carlton

The complete microwave oven service handbook.

Includes index.

1. Microwave ovens--Maintenance and repair. I. Title.

TX657.064G35 1989 683.83 88-29005

ISBN 0-13-162017-7

Table of Contents

Precautions

Preface

Part 1 Introduction to Microwave Energy

Chapter One *A Brief History of Microwave Oven Development*

Chapter Two *Basic Principles of Microwave Energy*

- 2.1 Introduction
- 2.2 Ionizing Radiation
- 2.3 Non-Ionizing Radiation
- 2.4 Two Thousand Four Hundred and Fifty Million Hertz
- 2.5 How Food Is Cooked By Microwaves
- 2.6 Microwave Penetration
- 2.7 Proportional Relationships
- 2.8 Microwaves and Metal
- 2.9 Arcing and Backfeeding

Chapter Three *Safety of Microwave Energy: An Objective Discussion*

- 3.1 Introduction
- 3.2 Microwaves—How Dangerous Are They?
- 3.3 Measuring Microwaves
- 3.4 Soviet Standards
- 3.5 What Are Safe Levels of Exposure?
- 3.6 How Far Away Is Safe?
- 3.7 Microwaves and Cardiac Pacemakers
- 3.8 Radiation Injuries From Microwave Ovens?
- 3.9 Color Television Emissions

Part 2 Preparing to Repair Microwave Ovens

Chapter Four *Safety Considerations*

- 4.1 Introduction
- 4.2 Safety Around Line Voltage
- 4.3 Warning—High Voltage
- 4.4 Warning—Possible RF Exposure

4.5 On-The-Job Safety

4.6 Lift So As To Be Able To Lift Again

Chapter Five *A Well-Organized Shop*

5.1 Introduction

5.2 Tools and Test Equipment

5.2.1 Hand Tools

5.2.2 Additional Equipment and Supplies

5.2.3. Test Equipment

5.3 Special Tools

5.4 “Homemade” Tools, Miscellaneous Equipment and Supplies

5.5 Supplies

Chapter Six *Rendering In-Home Service with Confidence*

6.1 Introduction

6.2 Working Under Scrutinizing Eyes

6.3 Quality of Workmanship

Part 3 Description of Operation

Chapter Seven *The High-Voltage System*

7.1 Introduction

7.2 Magnetron Tube

7.3 Basic Magnetron Operation

7.3.1 Effect of The Magnetic Field

7.3.2 Resonant Circuits

7.3.3 The Waveguide

7.3.4 RF Capacitors

7.3.5 Cooling Fins

7.3.6 Proper Phasing

7.3.7 Magnetron Life Expectancy

7.4 Transformers

7.4.1 High-Voltage Transformer — Fig. 7-11

7.4.2 Filament Transformer

7.5 The High-Voltage Capacitor and

Diode—The Voltage-Doubler Circuit

7.5.1 The High-Voltage Capacitor

7.5.2 The High-Voltage Diode

Section Title Reference Links

- 7.6 The High-Voltage Circuit—Voltage Doubler Operation
 - 7.6.1 Half-Wave Voltage Doubter
 - 7.6.2 Full-Wave Voltage Doubler

Chapter Eight *Control System*

- 8.1 Introduction
- 8.2 Timers
- 8.3 Pushbutton Timers
- 8.4 Add Integrated Circuits
- 8.5 Microprocessors and Computer Electronics
- 8.6 Electronic Timers—Past and Present
 - 8.6.1 Glass Touch Panels
 - 8.6.2 Membrane Switch Panels
- 8.7 Typical Electronic Control Systems
 - 8.7.1 Description of Generalized Control Panel Circuit
 - 8.7.2 Control Transformer
 - 8.7.3 The Cook Relay
- 8.8 Standby, Idle, and Cook
 - Example 8.8.1: Description of Start-Up, Holding and Shut-Down Operation
 - Example 8.8.2: Description of Start-Up, Holding and Shut-Down
 - Example 8.8.3: Description of Start-Up, Idle and Cooking Operation
- 8.11 Output Power Control
- 8.12 Primary Side Duty Control
 - 8.12.1 Mechanical Controllers
 - 8.12.2 Solid State Controllers
- 8.13 Triacs
 - 8.13.05 Triac Drive Circuit
 - 8.13.1 System Operation
 - 8.13.2 Additional Triac Information
- 8.14 Secondary (High-Voltage) Side Duty Control
- 8.15 Phase Control Circuit
- 8.16 Advanced Systems
- 8.17 Secondary Control By Varying The

- High-Voltage Potential
- 8.18 The Probe
- 8.19 Humidity Sensor Cooking
- 8.20 Absolute Humidity Sensor
- 8.21 Infrared Sensor Unit
- 8.22 Convection Cooking Control
- 8.23 Additional Control Concepts
- 8.24 New Cooking Technology
 - 8.24.1 Inverter Technology
 - 8.24.2 Advantium™ “Speedcooking” Using The Power of Light
 - 8.24.3 The NCR Microwave Bank—An Internet-Ready Computer Built Into A
 - 8.24.4 Samsung—Net Microwave

Chapter Nine *Safety and Protection Circuits*

- 9.1 Introduction
- 9.2 Interlock Switches and Circuits
- 9.3 Interlock-Monitor Switch
- 9.4 Interlock Sequencing
- 9.5 Interlock Protection Postscript
- 9.6 Additional Switch Applications
- 9.7 Protection Devices
 - 9.7.1 Thermal Protectors
 - 9.7.2 Ferrite Isolator Thermal Protectors
 - 9.7.3 Non-Resetting Thermal Fuses
- 9.8 Voltage Protection Devices
 - 9.8.1 Varistor
 - 9.8.2 Surge Absorbers
 - 9.8.3 PTC Resistor
- 9.9 Fuses
- 9.10 Magnetron Protection and Failure Detection

Chapter Ten *Microwave Containment Systems*

- 10.1 Introduction
- 10.2 The Cooking Cavity
- 10.3 The Cooking Shelf
- 10.4 The Waveguide
- 10.5 The Door Leakage Safety System

Section Title Reference Links

Chapter Eleven *Cooling and Energy Dispersion Systems*

- 11.1 Introduction
- 11.2 Cooling Systems
- 11.3 Stirrer, Food Rotatio, Energy Dispersal
- 11.4 Carousel Or Turntable Systems
- 11.5 The Rotating Antenna
- 11.6 Stirrer and Waveguide Covers
- 11.7 Baffle Systems

Part 4 Component Tests, Failures, and Corrective Actions

Chapter Twelve *High Voltage Components Testing and Failure Modes*

- 12.1 Introduction
- 12.2 Isolation Test
 - 12.2.1 Isolating The Problem Area
- 12.3 Power Output Check Using A Centigrade Thermometer
 - 12.3.1 Power Output Check Using A Fahrenheit Thermometer
 - 12.3.2 Increasing Or Decreasing The Output
- 12.4 Magnetron Failure Modes
- 12.5 Magnetron Testing
 - 12.5.1 Magnetron Plate Current (Ip) Test
 - 12.5.2 Analysis of The Plate Current (Ip) Test Results
- 12.6 Magnetron Removal and Installation Considerations
- 12.7 Filament Transformer Testing
 - 12.7.1 Filament Transformer Voltage Test
 - 12.7.2 Filament Voltage Test Results
- 12.8 High-Voltage (Also Power Or Plate) Transformer Test
- 12.9 High-Voltage Capacitor Test
 - 12.9.1 Frequency Conversion

- 12.10 Diode (Rectifier) Check
 - 12.10.1 Diode Installation
 - 12.10.2 Checking Half-Wave Rectifiers
- 12.11 Wiring and Connector Considerations

Chapter Thirteen *Control Components: Tests and Failures*

- 13.1 Testing Basic Electromechanical Timers
 - 13.1.1 Operational Timer Motor Check
 - 13.1.2 Operational Switch Contact Test
 - 13.1.3 Installation Considerations
- 13.2 Commercial Pushbutton Timers
 - 13.2.1 Printed Circuit Board Repair Considerations
 - 13.2.2 Operational Test
 - 13.2.3 Commercial Electro-mechanical Pushbutton Timer Resistance Checks
- 13.3 Solid State Commercial Timers
 - 13.3.1 Symptoms That Can Denote A Defective Electronic Timer
- 13.4 Domestic Control Circuits—Checks and Failures
- 13.5 Mylar (Membrane) Touch Panel Or The Control Panel—Which?
 - 13.5.1 Membrane Touch Panel Evaluations and Considerations
- 13.6 Low-Voltage (Control) Transformer and Transmotor Checks
- 13.7 Warm-Up Relays and Time Delay Circuits.
 - 13.7.1 Time Delay Board Test
 - 13.7.2 100 Millisecond-Delay Board Test
 - 13.7.3 Surge Relay Check
- 13.8 Start-Up, Shut-Down, and Holding Relays
 - 13.8.1 Load Resistor Check

Section Title Reference Links

- 13.8.2 Associated Symptoms
- 13.9 Checking Relays In General
 - 13.9.1 General Relay Checkout Procedure
- 13.10 Output Power-Control Component Testing
 - 13.10.1 Primary Side Power—Control Component Testing
- 13.11 Solid State Controllers
- 13.12 Triac Tests
 - 13.12.1 Results and Symptoms
 - 13.12.2 Verifying Proper Dc Gate Voltage
 - 13.12.3 Gate-Firing Capability Check
 - 13.12.4 Results
- 13.13 Triac Operational Test
 - 13.13.1 Replacement Considerations
- 13.14 Amana Solid State Relay (Triac) Test
- 13.15 Triac Module Test
 - 13.15.1 Results and Symptoms
 - 13.15.2 Gate Voltage Verification
- 13.16 Auxiliary Module
- 13.17 Secondary-Side Power-Control Component Checks
 - 13.17.1 Troubleshooting Inverter Power Supplies
- 13.18 Checking Power Resistors
- 13.19 Temperature Control Probe Testing
- 13.20 Sensor Element and Associated Circuitry Test
 - 13.20.1 Results of Test #1
- 13.22 Infrared Sensor
- 13.23 Convection and Conventional Cooking Control
 - 13.23.1 Heating Element Test
 - 13.23.2 Additional Notes On Convection Elements
- 13.24 Thermistor Test

Chapter Fourteen *Safety and Protection Circuits: Tests and Failures*

- 14.1 Introduction
- 14.2 Door Interlock Switch Test
- 14.3 Interlock Switch Adjustment
- 14.4 Amana Latch Solenoid
- 14.5 Amana Multiprotector Assembly (Fig. 14-5)
 - 14.5.1 Replacement of Thermal Fuses
- 14.6 Checking Thermal Protectors—Resettable and Non-resettable
 - 14.6.1 Common Causes of Thermal Protector-Related Failures
- 14.7 Ferrite Isolator Test
 - 14.7.1 Isolator Removal and Replacement Considerations
- 14.8 Surge Monitor System
- 14.9 Checking Voltage Protection Devices
 - 14.9.1 Foil Patterns and Filter Coils
 - 14.9.2 PTC Surge Resistor Test
- 14.10 Line Fuse Testing and Fuse Failures

Chapter Fifteen *Containment Systems: Checks and Failures*

- 15.1 Introduction
- 15.2 Cleaning The *Choke* Cavity
- 15.3 Rust and Corrosion In The Cooking Cavity
 - 15.3.1 Damage To Metal Surface Beneath Amana Shelf
- 15.4 Painting The Cooking Cavity
- 15.5 How To Replace A Sealed-In Ceramic Shelf
 - 15.5.1 Shelves With A Preformed Gasket
- 15.6 Waveguide Disorders

Section Title Reference Links

- 15.7 Door Leakage and Safety System—Checks and Failures
 - 15.7.1 RF Leakage Test Procedure
- 15.8 Door Adjustment
 - 15.8a General Door Alignment
 - 15.8.1 Service Tip On *Amana* Doors
 - 15.8.2 Steam and Light Escaping Around The Door
- 15.9 *Amana* Inner-Door Moldings
 - 15.9.1 Replacing Inner Door Moldings
- 15.10 General Door Disassembly
 - 15.10.1 Commercial Litton Doors
 - 15.10.2 Commercial Panasonic, Hobart, *Amana* & Sharp Doors
 - 15.10.3 Residential Ovens—Litton-Made *Kenmore* Doors and *Magic Chef* Doors

Chapter Sixteen *Cooling and Energy Dispersion: Checks and Failures*

- 16.1 Introduction
- 16.2 Symptoms of Blower System-Related Troubles
- 16.3 Blower Motor Test
 - 16.3.1 Operational Blower Motor Test
 - 16.3.2 An Alternate Test
- 16.4 Energy Distributions Systems—Checks and Failures
 - 16.4.1 Microwave Heat Distribution Test
 - 16.4.2 Verifying Stirrer Or Antenna Rotation
- 16.5 Stirrer Or Antenna Maintenance—Air-Driven
- 16.6 Stirrer Or Antenna Maintenance—Motor-Driven
 - 16.6.1 An Operational Check
 - 16.6.2 An Alternate Test

- 16.6.3 Stirrer Or Antenna Motor Replacement Considerations
- 16.7 Rotation Systems—Checks and Failures
- 16.8 Stirrer and Waveguide Covers, Grease and Splatter Shields—
- 16.9 Interrelated Failures

Part 5 Troubleshooting By Symptom, Make, and Model Chapter Seventeen *The Art of Common Sense Troubleshooting*

- 17.1 Introduction
- 17.2 Practical Wisdom In Troubleshooting
 - 17.2.1 Sample Troubles
 - 17.2.2 A Final Note On Troubleshooting
- 17.3 Guilt By Association

Chapter Eighteen *Troubleshooting Commercial Models—Service Codes and Procedures*

- 18.1 Important Information
- 18.2 Commercial Models and Domestic Models—What is the Difference?
- 18.3 Voltage Selection
- 18.4 Secrets of Service Access
- 18.5 Multiple Magnetron Systems
- 18.6 Failure Codes and Service Procedures

Appendices

- Appendix I *Touch Panel Test and Reference Matrix Diagrams*
- Appendix II *Microwave Cooking Techniques*
- Appendix III *Glossary*
- Appendix IV *Manufacturer's Addresses*
- Appendix V *Repair Case History Database—Symptoms and Solutions*
